

The Press have been completely out of control for far too long, their pathetic attempts at Self Regulation have been a complete disaster and should be totally ignored.

The Press have intruded into peoples grief and made bad situations worse, they claim they are reporting "In The Public Interest" but most of the time the Red Tops are doing it purely and simply for the sales figures, they don't care a jot, fig or whistle for the people they trample all over.

I'm fortunate, I've never been in a position where I've come to the attention of the press, but too many ordinary people have had their lives turned upside down by the intrusion of these baser members of the press corps.

An ordinary citizen of this country, without the shield of a Press Pass has to obey a variety of laws that have been designed over centuries to protect their civil liberties and to stop them from causing upset and harm to their fellow citizens, so how is it that the press can cause untold anguish and misery without any retribution falling on their miserable heads ?

This is WRONG ! David Cameron MUST follow through with his promise to undertake the second part of the Leveson Enquiry and put PROPER safeguards in place !
