

Clearly the press have not taken the Leveson report to heart and the Govt is dragging its feet over this as well as banking regulation. Tell the Govt to bring into force the laws based on the Leveson enquiry.

On a more general level I see no reason why the press should not be regulated in the same way as television and be required to be even handed on political matters. And why should much of our media be foreign owned - I believe the USA requires theirs to be owned by American citizens.
