

Attendance note

27/09/2016

SU/JH

Speaking to JH on his calling. They had been going through the responses and they were fairly confident that they would have considered all of them and be able to let us have their response within the next day or so. They would be referencing our draft summary and cover email in the response.

JH said that he was just discussing the decision meeting (which he presumed would take place in October or November and we would let them know when the date had been set) with Walter Merrick and they got a flavour of what it may be like from the August meeting. They wanted to explore whether they needed to attend and whether there was a way they could give a considered response to any questions the PRP Board may have of them rather than give immediate answers when they may need to check on details.

SU said that the guidance set out the procedure and we would need to follow and she would need to check on the precise wording but she would check if the Board required them to be available and didn't think there would be a problem if they needed a little time to check on specific details.

JH said they would send over a note.
